

Spandex Sign and Display Systems

Sign decisions made simple

Spandex Sign and Display Systems are the preferred choice of architects, designers and signmakers worldwide...

Spandex Modular Sign Systems are available in component lengths which allows the sign maker the freedom to customise the finished sign to a client's specification.

Services for Signmakers

Cut-to-size service.

If you are more interested in selling signs than making them, Spandex Sign Systems Centres are the solution for you.

Simply specify your requirements and leave the rest to a Spandex Sign System Centre who have the manufacturing skills and service experience to support the sign trade with quality Spandex modular signs or complete bespoke solutions – all finished to perfection.

Free quotation service.

Spandex will arrange for competitive quotations from our network of approved Signs Systems Centres on your behalf.

One phone call is all it takes.

Services for end users, specifiers and architects

Spandex have been working closely with architects, designers, facilities managers, specifiers and end users for many years and we are happy to share our expertise in order to get the very best out of your sign programmes.

Should a Spandex Sign System be the right one, we can help you develop your project and can recommend sign companies that can provide high quality service at competitive prices.

We offer:

- Free consultation as to suitability of our sign system range to your requirements
- Samples to support presentation
- Worldwide accepted range of sign systems
- The most comprehensive ranges of modular sign systems to suit nearly all requirements

Versatile Signs

It could be a hotel or an office complex; a shopping centre or a business park.

Wherever there's a building to identify; a message to communicate; or people to direct; you'll find a Spandex sign system.... or the need for one.

Spandex is responsible for the design and distribution of the industry's most successful and comprehensive range of aluminium sign systems.

Innovative designs

If you think that working with sign systems might be too restricting - think again.

We've designed our sign system components to be as versatile as you need them to be. So, the signs you design or specify can be as individual as you want them to be.

No two signs need ever look the same. Unless, of course, you decide they should.

Hanging Monoform with Cable system ▼

▼ C-Fix finger pole system

Setting the standard

Spandex sign systems have set the industry standard worldwide since 1976.

On their own or as part of a co-ordinating programme of signs, our systems offer unlimited design opportunities.

You can confidently specify Spandex sign systems, secure in the knowledge that the sign system you've chosen has its future guaranteed by the world's largest sign supplies company.

Choosing the system

To find out what it is that makes Spandex sign systems so popular with architects, designers and signmakers alike, please spend a few moments looking at our sign systems individually.

It won't take you long to realise that there are literally hundreds of good reasons why you should be working with Spandex sign systems too.

Spandex Aluminium Sign Systems come in a variety of sizes, shapes and finishes to enable you to customise your sign from our standard components.

Slatz

Internal Directory Systems

- ◀ Slatz directory
- ▼ Engraver
- ▼ Inserting Slatz clips

The Slatz directory system is nothing short of a design classic. So simple, yet so versatile.

Slatz directories can be installed just about anywhere. Alcoves and inconvenient architecture are no problem for the unique face-fitting components of the Slatz sign system.

Slatz directories can even be recessed. Slatz components can be used to create everything from a single desktop sign to an entire programme of co-ordinating interior directories.

Wall-mounted or free-standing; projecting or suspended; single or double-sided; the Slatz directory system does it all.

Which is why Slatz is the preferred choice of architects, designers and signmakers worldwide.

- Single panel door signs
- Wall mounted / suspended directories
- Wayfinding / directional signs
- IN / OUT slider signage
- Braille and tactile signs
- Desktop signs

SlimSlatz

Internal Directory Systems

SlimSlatz directory ▶

In / Out slider ▼

Single panel door signs
Elegant low profile directories
Wayfinding / directional signs
IN / OUT slider signage

The SlimSlatz system combines versatility and elegance.

This refined sign system offers the same attractive user benefits as the original Slatz concept.

Spandex designers have condensed the Slatz virtues of simplicity, versatility, and functionality into an assembled profile of less than 8mm - though nothing has been sacrificed in terms of appearance.

Every SlimSlatz component has been designed with elegance in mind. Top and bottom faceplates fit flush to the mounting surface. This conceals the inner workings of the directory and provides a perfect finish to a perfect sign system.

SlimSlatz co-ordinates beautifully with every other system in the Spandex range. Which means that even the smallest interior sign can complement the largest exterior identity programme.

Insertz

Internal Directory Systems

◀ A4 Insertz

▼ Cut to Size available

Insertz is the attractively new way to display signs and graphics that require frequent or occasional updating.

Equipped with nothing more than an ordinary office printer, you can create equally impressive Insertz signs direct from your desktop and update them just as easily.

The anti-glare polycarbonate panel protects against unwelcome tampering and enhances the appearance of your graphics too.

Available off-the-shelf in a range of industry standard sizes or 2.2 metre lengths for custom conversion, the insertz system is as versatile as you need it to be.

No matter how or where, you'll find Insertz easy to specify, easy to install and even easier to update.

Wayfinding

Infopanel is the key to great looking exterior directories. It's as versatile as you need it to be.

The system's robust, extruded aluminium posts, poles and panels combine to provide exterior directory signs with real presence.

Freestanding or wall mounted, any number of "looks" can be achieved using Infopanel decorative post caps and corner components.

You can even illuminate your exterior directories with Infopanel Luminaire. Infopanel Edge and Brace components allow custom panels of any size to be used, adding even greater impact to your exterior signs.

Monoframe

External Directory Systems

- ◀ Base mounted
- ▼ Identity signage

Monoframe is the most direct route to attractive, post or base-mounted identity signs. Monoframe will make sure your message gets noticed.

Whether you opt for the slim Monoframe 55, or the imposing Monoframe 175; working with this sign system is so straight forward, so why waste your valuable time with anything else?

Monoframe exterior identity signs are absolutely ideal for business or science park locations and similar corporate facilities.

- Corporate identity signage
- Directional signage
- Site map signage
- Business park signs
- Information signs

Pole and panel signage

Single and double sided

The C-Fix system is a refreshingly modern approach to 'fingerpost' signs. This attractive modular sign system has been designed to meet the demand for an alternative to the overworked 'Victoriana' style.

Exterior or interior locations; on its own or as part of a programme of signs; the C-Fix system can be used to direct, identify or inform. C-Fix signs can be finished with flat aluminium caps or the attractive C-Fix Dome Cap.

Alternatively, you might like to top your sign off with a round or rectangular Crown Panel. The optional Crown Panel components are perfect for displaying additional information or advertising.

C-Fix. Its versatility will appeal to you. Its profile will appeal to everyone.

Sculptura

Monolith Systems

- ◀ Triangular freestanding
- ▼ Square profile

Sculptura is the system to call for when a project cries out for something different.

Create free-standing columns with radius, triangular or square profiles. Give your signs the size and proportions which will guarantee maximum visual impact.

Incorporate Slatz directories or design stencil cuts for flush-fitting sheet aluminium and back illumination.

The possibilities for Sculptura are endless.

- Freestanding directories
- Corporate identity
- Information signage
- Business park signs

Monoform

Curved Systems

Wall mounted ▶

Freestanding ▼

- Corporate identity signage
- Freestanding directories
- Backlit advertising
- Information signs
- Wall mounted / suspended
- Curved signs

Freestanding, wall mounted, suspended or projecting, Monoform lets you put curves in all the right places.

Monoform gives you a free hand to produce beautifully curved signs up to 2.5 metres high. You can use sheet aluminium without rolling or welding.

Turn a few screws and Monoform's clever tensioning system produces the attractive, evenly curved face panels for you.

Designed on the solid foundations of our off-the-shelf monolith system, Sculptura - renowned in the industry for its strength, versatility and ease of assembly - you'll find working with Monoform is just as easy.

And the signs you produce just as impressive.

Navigator

Curved Systems

- ◀ Freestanding
- ▼ Aluminium extrusion

The Navigator signpole is simple and versatile to use, enabling sign makers to create contemporary signs with bespoke curved monolith structures.

Signmakers are free to fabricate a huge variety of central structures to fit between the Navigator signpoles. They strengthen and enhance the appearance of curved modular signs.

- Available in 6030mm mill finish length extrusions.
- Can be used with a wide variety of materials and widths to meet any requirement.
- Designed to take steel stiffeners for larger sign fabrication.
- Bespoke curves available.
- Navigator signpoles may be sunk into concrete or mounted onto a concrete footing.

Mainframe/Miniframe

Signbox / Frame Systems

Wall mounted ▶

Illuminated ▼

- Wall mounted signboxes
- Illuminated fascia signboxes
- Projected signboxes
- Double-sided signboxes

The Mainframe signbox system makes the perfect fascia signbox. This versatile system accepts rigid acrylic face material from 3mm to 6mm, which can be stencil cut or decorated with translucent films.

Mainframe's design allows easy access to electrical fittings for problem free maintenance.

Square section or curved edges; single or double sided; wall mounted or projecting; fixed direct or on stand-off brackets; the choice is yours with Mainframe.

With its non-illuminated counterpart, Miniframe; you won't find a better way to produce illuminated signboxes or non-illuminated sign frames.

Klick Rail

Signbox / Frame Systems

- ◀ Illuminated fascia
- ▼ Shop canopies

Klick Rail is the professional approach to big signs. Illuminated or non-illuminated, Klick Rail gives you the biggest and brightest single or double-sided signs.

The Klick Rail framework utilises flexible face materials.

Its highly effective tensioning system takes all the strain out of even the largest signs. You have the freedom to create fascia signs of virtually any size with Klick Rail.

It also lets you take signs around corners seamlessly. Perfect for projects like filling station canopies.

- Large fascia signs
- Forecourt canopies
- Illuminated retail fascia signage
- Filling station canopies

Festival

Banner Systems

Hanging banners
Rigid pennants

Festival banner poles turn the humble banner into a refined architectural feature.

From shopping malls to exhibition halls; Festival can be seen supporting banners and attracting attention.

Based on our successful Signpole 20 and 40 aluminium extrusions, Festival uses the minimum of components to maximum effect.

Hanging or projecting; with plain or decorative moulded end caps; Festival is easy to use and can co-ordinate beautifully with other Spandex sign systems.

BannerTrack

Banner Systems

- ◀ Wall mounted BannerTrack
- ▼ Twist and fix fasteners

BannerTrack is the permanent solution for displaying temporary signs. From promotional banners to poster-sized prints.

With its patented 'twist and fix' fasteners and unobtrusive aluminium profile, BannerTrack solves the problem of drooping banners once and for all.

Banners and signs of virtually any length can be installed, removed or repositioned effortlessly.

BannerTrack can be recessed or taken around corners and looks great as a contrasting décor line or custom finished to match an existing colour scheme.

Temporary displays

As an easy-to-cut and quick-to-assemble method for producing hanging banner displays, Banner-Fix is highly portable and can therefore be used in any location where digital graphics are needed.

The system uses a stylish, silver anodized aluminium clamp rail to deliver the sophisticated finishing touch to eye-catching and effective graphic displays.

Digitally printed graphics are clamped top and bottom with the Banner-Fix rail and may be suspended from cable systems or simply fixed onto walls using supplied hooks.

Pavement Signs

◀ Swinger 2000

▼ Eurosign

Spandex has many different shapes and sizes of pavement signs to offer.

Whatever the location we have a solution which will get your business noticed by the passing pedestrian.

Traditional A-Frames, swinging or stationary panels, water fill-able bases and even extra header panels are all available from our pavement sign range.

Graphic displays
Promotional signage
Temporary displays

The SnapFast range is a suite of ready-to-use, quick-change poster frames.

Available off-the shelf, in a number of popular sizes in a silver anodised finish, the range is both good looking and easy to use.

- Instant - requires no assembly, all systems are ready to use
- Secure - literature neatly held in position for a professional presentation
- Lightweight and durable
- Antiglare poster covers
- Available in 3 different profile sizes; 15, 25 and 38mm
- A variety of standard poster sizes are available, A1 to A4 and imperial sizes

Display Systems

▼ 200 Series - Stand Up Displays

▼ 300 Series - Roll Up Displays

200 Series - Stand Up Displays

A highly portable, versatile and cost effective banner display that is lightweight, very stable and simple to use. Available in 2 models - single and double sided - at 3 different widths, 60, 80 and 100cm.

Quick to assemble with lightweight silver anodised Banner-Fix clamp rails, both top and bottom, which allow the graphics to be interchanged easily.

300 Series - Roll Up Displays

Ideal for POP and POS, retail, temporary advertising and exhibition use. Available in 2 models - 300 and 301, they are highly portable, versatile and quick to assemble. Light weight for ease of transportation with simple graphic changing.

Display Systems

▼ 400 Series - Electronic Rolling Display

▼ 500 Series - Pop Up Display

- Point of purchase
- Point of sale
- Retail signage
- Temporary advertising
- Exhibition displays

400 Series - Electronic Rolling Display

Ideal for point of sale, retail and exhibition use and can be wall or ceiling mounted to give a double sided effect (mounting brackets not supplied).

The 400 Series can be customised to any banner length (up to 1.75m) and is quick to assemble. A weighted pole inserted within the banner loop provides a consistent graphic tension.

500 Series - Pop-Up Display

Perfect for all your banner and graphic display needs, the Pop-Up Display system is a professional, lightweight and versatile way for attractive graphic images and advertising to be displayed.

Highly portable the Pop-Up Display system comes with a robust case and is easy to assemble with its fully retractable parts.
